

## ER8 Series

# PCIe Gen.4 High Speed Transmission (16<sup>+</sup>Gbps), 0.8mm Pitch, Board-to-Board Connectors

**FunctionMAX™**

High Speed

Wide Variation

P= 0.8mm

## Features

---

1. Pitch : 0.8mm
2. Variations :  
Right Angle / Parallel / Coplanar
3. Stacking Height :  
7/9/10/12mm
4. Number of Positions :  
10/20/30/40/50/60  
70/80/100/120/140pos.
5. Large Guide for Easy Mating  
  
Self-alignment Range:  $\pm 1.6$ mm
6. Unique Contact Design for Smooth Mating
7. Samtec “Edge Rate<sup>®</sup>”  
Licensed Second Source

## High Speed Transmission Characteristics

### ● Differential Insertion Loss

Supports PCIe Gen.4 with sufficient margin.

### ● Differential Impedance

85Ω (Tr=35ps, 20%-80%)

## Product Specification

Rated Current (Note 1)	0.5A (Signal)	Operating Temperature (Note 2)	-55 to +125°C
Rated Voltage	100V AC	Storage Temperature (Note 3)	-10 to +60°C

Item	Specifications	Conditions
Contact Resistance	50mΩ Max.	100mA
Insulation Resistance	1000MΩ Min.	100V DC
Withstanding Voltage	No flashover or insulation breakdown	300V AC for 1 min.
Mating Durability	Contact resistance change : 15mΩ Max. No flash over or insulation breakdown. No damage, cracks or part dislocation.	100 times
Vibration Resistance	No electrical discontinuity of 1 μs Min.	Frequency : 20 to 500Hz, Power spectral density : 0.02G <sup>2</sup> /Hz 3 times in each of the 3 directions
Shock Resistance	No electrical discontinuity of 1 μs Min.	980m/s <sup>2</sup> , Duration of pulse 6ms, 90 minutes each of 3-axis direction
Temperature Cycles	Contact resistance change : 15mΩ Max. Insulation resistance : 1000MΩ Min. No flashover or insulation breakdown No damage, cracks or part dislocation.	25°C , 90-95% RH : 120 min. ↑ ↓ 120 min. 65°C , 90-95% RH : 120 min. 12 times

Note 1 : Current rating per 1 contact is used.

Note 2 : Includes temperature rise due to current flow.

Note 3 : The term "storage" refers to products stored for long period of time prior to mounting and use.

Note 4 : Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

## Materials / Finish

### ● Straight Receptacle / Header

Component	Material	Color / Finish	Remarks
Insulation	LCP	Black	UL94V-0
Signal Contact	Copper Alloy	Contact Area : Gold Plating Mounting Area : Tin Plating	—

### ● Right Angle Receptacle / Header

Component	Material	Color / Finish	Remarks
Insulation	LCP	Black	UL94V-0
Signal Contact	Copper Alloy	Contact Area : Gold Plating Mounting Area : Tin Plating	—
Retention Peg	Copper Alloy	Mounting Area : Tin Plating	—
Retention Pin	Copper Alloy	Mounting Area : Tin Plating	—

## Product Number Structure

Refer to the chart below when determining the product specifications from the product number.  
Please select from the product numbers listed in this catalog when placing orders.

12mm	○	○	○	○	○	○	○	○	○	○	○

○ = Available

## Signal Integrity

### ● Pin Assignment

To match 85Ω differential impedance and to reduce crosstalk, a staggered GSSG pin assignment is recommended for ER8.

\* Analysis results only.

### ● Impedance

The differential impedance is 85Ω at 35ps rise time (20% to 80%)

## ● Insertion Loss

## ● Return Loss

## ● Crosstalk

The below diagram shows the NEXT and FEXT in the same row with the highest influence.

## ● Near-end Crosstalk (NEXT)

## ● Far-end Crosstalk (FEXT)

## Mating Operation

### ● Mating Self-Alignment Tolerance (Note)

### ● Mating Angle Tolerance (Note)

A mating angle of  $5^\circ$  is allowed in the longitudinal (X) direction. Mating at an angle in the lateral (Y) direction is not recommended.

Note : The above mating conditions show the allowed values for the mating self-alignment and mating angles separately. The self alignment tolerance and angle tolerance are not satisfied at the same time.

## Recommended Spacer Height

Spacers are required to support PWB's and protect the SMT solder joints.

Unit : mm

Stacking Height	Recommended Spacer Height
7	$7.15 \pm 0.05$
9	$9.15 \pm 0.05$
10	$10.15 \pm 0.05$
12	$12.15 \pm 0.05$

## Mounting Temperature Profile (Reference)

### ● Pb-Free Assembly

Preheat / Soak (150 to 200°C)	Max. Ramp Up Rate	Reflow Time (217°C Min.)	Peak Temperature	Peak Temperature Time	Cooling Rate	Time Between Normal Temperature and Peak
60 - 120 sec.	3°C Max./s	40 - 150 sec.	260°C	30 sec. Max.	6°C Max./s	8 min Min.

## Recommended Temperature Profile

Temperature profile may change depending on the solder paste types, manufacturers, PCB size, and other soldering materials. Please fully check the mounting conditions before use.

## Cleaning Conditions

### ● Cleaning with Organic Solvent

Solvent	Cleaning at Normal Temperature	Heated Cleaning
IPA (Isopropyl Alcohol)	Yes	Yes
HCFC (Hydrochlorofluorocarbon)	Yes	Yes

### ● Cleaning with Water

When water-type cleaning agents (terpene, alkaline saponification agents) are used, select cleaning agents based on the 'table of influence' on metals and resins issued by the cleaning agent manufacturer.

Caution : Do not leave the connector with any water content left on it.

### ● Cleaning Precautions

If flux or cleaning agent remains on the connector during part cleaning with organic solvent and water-based agents, it may cause deterioration of electrical performance. Confirm cleaning is performed properly.

## While Taking into Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non- specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, assurance will not be given.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/ defense etc. Hirose must review before assurance of reliability can be given.
